

FORM
LIGHTING

FUNCTION AND FORM

In the automotive aftermarket, LED headlight and tail light replacement options were previously divided into two categories: low-priced replacements that lack style and function or high-end premium alternatives that came at a hefty price. Form Lighting was founded in 2022 to bridge this gap and offer consumers a premium-style full-LED lighting solution with modern features at an affordable price point.

The Form Lighting team consists of veteran industry professionals who understand what is important when delivering high-quality lighting products. We are proud to offer consumers quality LED lighting solutions at a reasonable price.
