## 2022+ Toyota Tundra SS6 LED Fog Light Kit Installation Guide

Thank you for your purchase of this custom-designed LED fog light kit for your 2022+ Toyota Tundra! This kit utilizes both factory and included hardware to mount the bracket to the vehicle.

**Tools Needed:** Phillips screwdriver, Phillips screwdriver bit, ratchet/extensions

1. Remove the front bumper molding by pulling outward, releasing the clips. The edges have a lip sitting behind the front bumper cover, slide the edges inward prior to pulling out.

2. Using a Phillips screwdriver, remove the two screws securing the factory fog light to the front bumper. Then remove the factory fog light from the vehicle, and unplug the factory fog light connector.

Repeat this step on the other side of the vehicle.

*See back for further instructions.*

3. Install the four included fog light brackets onto the sides of your new Stage Series 6" light bars using the included hardware.

4. Use the included adapter wire to connect the light bar to the vehicle harness. Test function. If the light does not turn on, try flipping the connector 180°

5. Install your new light bar and bracket into the factory location using the factory screws. Repeat this step on the other side of the vehicle.

6. Test thoroughly and aim the light bars as needed. Secure the wiring using the included zip ties.

7. Reinstall the front bumper molding to complete installation.

Please contact **Diode Dynamics** should you have any questions about the installation or wiring process, at **314-205-3033** (10a-5p CST) or **contact@diodedynamics.com**.
