

SL1 LED BULBS

- Direct plug-and-play replacement bulb
- Correct optical focus for Street Legal output
- Engineered and assembled in USA
- Zinc-cast heatsink and driver for reliability
- Copper-core PCB core for maximum heat transfer
- Dust and water-resistant MagLevSunon Fan
- 1630 lumens

\$200.00/PAIR
DD0217

SEQUENCER (PAIR)

- Adds sequential pattern to all tail light functions
- OEM tail light connectors for simple plug-and-play installation
- Assembled in USA

\$80.00/SET
DD3016

EXTERIOR/INTERIOR LED BULBS

- Direct replacement for factory bulb
- Brighter, more modern appearance
- Available in multiple brightness levels

LICENSE HP5 White
TRUNK HP6 White
MAP HP5 White

The Diode Difference

XM0056G

At Diode Dynamics, we conduct all necessary engineering and testing for our products internally in St. Charles, Missouri. Unlike other manufacturers, we test the LED bulbs inside factory lamps, to check the resulting performance and output. We conduct this testing in-house with our goniometer, which is a machine that slowly rotates a factory lamp, and measures the effective beam pattern.

Many of our products are proudly produced in-house by our manufacturing division. This allows us to maintain complete quality control with the final application in mind and deliver products to the market much quicker than others in the industry.
